

ABSTRACT

Internship is the especially import part of the university students' education before they graduate. In this session, they may find out their qualitifcations and skills according valuable hand-on experience. It is essential not to have any regret in decisions making with their selections before serving internship and get satisfaction after performing internship. **“UCSM Internship Portal Management System”** aims to make more efficient in administrative processes, less time taking and reduce paperwork, human resources and cost for all participants. The system have three participants: admin(university), students and companies. All users can view our homepage and learn about internship. For admin, after his valid login, there has an admin panel to manage all informations about internships, to manage all accounts of students and companies and to manage job posts. Primarily, students and companies need to register to our system. Student will be able to login into the system after registration and search for a relevant job and apply for those positions. Company will be able to post all about vacant jobs and descriptions of their community after registration and login process. The system is developed by using PHP, MySQL Database, HTML, CSS and JavaScript and we also use Bootstrap for more convenient user interface (UI) and we also use draw.io for UML diagrams.
